### DETAILED ACTION

This Office Action is in response to the Amendment filed on December 23, 2004. Applicant's cooperation in correcting the informalities in the specification is appreciated. Applicant's cooperation in amending the claims to overcome the claim objections relating to informalities as well as indefinite claim language is also appreciated. Claims 16 and 22 were amended; claims 29-31 were added; and claims 1-15 were cancelled.

### ***Allowable Subject Matter***

The following is an examiner's statement of reasons for allowance: None of the cited prior art alone or in combination teaches the claimed combination of an electromechanical actuator for regulating a turbocharged internal combustion engine including:

" Regarding claim 1:

*a solenoid having a sliding ferromagnetic nucleus therein, said sliding ferromagnetic nucleus is balanced by spring and supplied with a rod at a first end thereof that interacts with a pivot point of the turbocharger; and a sensing system, being outside a boundary defined by said solenoid, for sensing a position occupied by the ferromagnetic nucleus in the solenoid.*

Regarding claim 30:

*a substantially solid ferromagnetic nucleus axially slidable within said solenoid."*

**Conclusion**

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
